

## Move light

The freedom to go where you want, when you want is more important than ever. Other ways of getting around the city are no longer a serious proposition for you. And right now you need to look at alternative forms of personal mobility to ensure your continued independence.

Never again will you have to wait for a crowded bus or train! The new D'elight is fully automatic, so you simply twist the throttle and go – making it ideal for female and male riders who may be just starting out on two wheels. And being the lightest in its class, this smart urban scooter is a total joy to ride and extremely easy to park.

Its 125cc Blue Core engine gives you good performance with outstanding fuel efficiency, making it one of the most economical scooters in the 125cc category – and with its class-leading storage space, stylish instruments and a high quality finish, the D'elight is hard to resist.

- New design with new lights and LCD instruments
- 125cc Blue Core EURO5 engine
- Lightest in class
- Large underseat storage
- Start & Stop engine technology
- 12-inch front wheel, 10-inch rear wheel

## 125cc Blue Core EURO5 engine

Yamaha's latest generation 125cc Blue Core EURO5 engine features cutting edge technology that ensures maximum efficiency with outstanding reliability. Maximum torque is produced at much lower engine speeds than other models in the class, giving excellent economy with strong acceleration.

## New design with new lights and LCD instruments

With its completely restyled body design the new D'elight looks better than ever. Featuring a redesigned front cowling and a more rounded headlight – as well as a new LED position lamp and new flashers – this lightweight urban commuter is one of the coolest scooters in the 125cc category. There's also a new analogue meter with LCD display and warning lights.

## Lightest in class

Weighing only 101 kg wet, the D'elight is the lightest scooter in its class. Its low weight makes this new unisex scooter so much fun to ride – as well as making it more agile and manoeuvrable in traffic, and easier to park.

## Large underseat storage

The D'elight comes with plenty of storage space under the seat – in fact it's one of the only scooters in the class that can accommodate a full-face helmet. When you're on the move it's the perfect place to carry personal belongings, and is ideal for when you need to pop down to the shops for a few extra groceries.

## Start & Stop engine technology

D'elight is one of the first scooters in the class to benefit from the latest Start & Stop technology. By turning the engine off when the scooter is stationary, emissions are reduced and fuel economy is increased, helping to cut urban pollution while also saving you money.

## 12-inch front wheel, 10-inch rear wheel

The unique combination of a 12-inch front wheel and a 10-inch rear wheel contributes towards the D'elight's agile handling qualities. Lightweight 6-spoke alloy wheels keep overall weight down, and the 90/90-12 front tyre and 100/90-10 rear tyre provide excellent grip.

## Engine

Engine type	Air-cooled;4-valves;4-stroke;EURO5;SOHC
Displacement	125cc
Bore x stroke	52.4×57.9mm
Compression ratio	10.2:1
Maximum power	6.2kW(8.4PS)/7000r/min
Maximum Torque	9.8N·m(1.0kgf·m)/5000r/min
Lubrication system	Wet sump
Fuel system	Fuel Injection
Ignition system	TCI
Starter system	Electric
Transmission system	V-Belt Automatic
Fuel consumption	1,8L/100km
